

Building a Rich People Search with OOTB and Open-Source Components

Tuesday November 7, 2023

11am EST

Introductions: Peter Carson

- President, Envision IT and Extranet User Manager
- 13-time Office Apps and Services Microsoft MVP
- peter@envisionit.com
- blog.petercarson.ca
- www.envisionit.com
- www.extranetusermanager.com
- www.linkedin.com/in/petercarson
- President, Toronto SharePoint User Group

Agenda

- Importance of People Search and Harnessing Employees' Expertise
- Building a Trusted Repository of People Information
- What is Entra ID?
- OOTB, Open Source, Commercial Options
- Viva Skills and LinkedIn Learning
- Applications and Demo

People as Sources of an Organization's Intellectual Property

- **Untapped Potential:** Employees possess vast amounts of knowledge and skills often unknown to the organization
 - Job roles don't often encapsulate the full range of an individual's abilities
- **Remote Challenges:** Distance and lack of in-person interactions make it harder to discover or leverage colleague's expertise
- **Silos of Knowledge:** Without centralized platforms, knowledge remains isolated and underutilized

How much of your IP lives in the minds of the staff?

“If only HP knew what HP knows, we would be three times more productive.”

Lew Platt, Former CEO of HP

- **Tacit** knowledge is in someone’s head, and the challenge is to make that knowledge **explicit**, or codified in recorded form so that it can be shared
- It’s generally accepted that about 20% of a corporation's knowledge is well documented, indexed and archived and can be easily accessed through Knowledge Management (KM) tools.
- [Tacit Knowledge Vs. Explicit Knowledge \(aiim.org\)](http://aiim.org)
- [The 80/20 rule of corporate knowledge | LinkedIn](#)

Challenges of the Current State

Where is your people data? HRIS, ERP or payroll systems, IT (Active Directory, Entra ID / Azure AD), LinkedIn, Excel?

How connected are your systems? Is there a system of record?

How well defined are your onboarding, offboarding, and role change processes?

What about profile pictures, expertise, and skills?

Identifying Sources of Information

1. What are all of your repositories?
 - Entra ID, On-prem Azure AD, HRIS systems, SuccessFactors, etc.
2. Which system is your primary system of records for people information?
3. What are your current processes for keeping these systems in sync?
4. Are these processes highly manual and/or cause friction/delays?
 - i.e. do multiple departments need to get involved to update people data across all systems?

What is Entra ID?

- **Entra:** New name for Microsoft's suite of identity and access products
- **Entra ID:** New name, same capabilities as Azure AD
- Other tools:
 - Microsoft Entra ID Governance
 - Microsoft Entra External ID
 - Microsoft Entra Verified ID
 - Microsoft Entra Permissions Management

Data Disarray: The Consequence of Non-Integrated Systems

Inaccurate Decision
Making

Decreased Productivity

Loss of Trust

Increased Operation
Cost

Decreased Data
Security

Canadian Tire InTIREnet

The NEW InTIREnet is here!

Access site content through streamlined navigation links

Rotating images of Canadian Tire's business units—click to access public sites

Find out what's going on at Canadian Tire

Read up on the latest industry news

Search for information by name, location, etc.

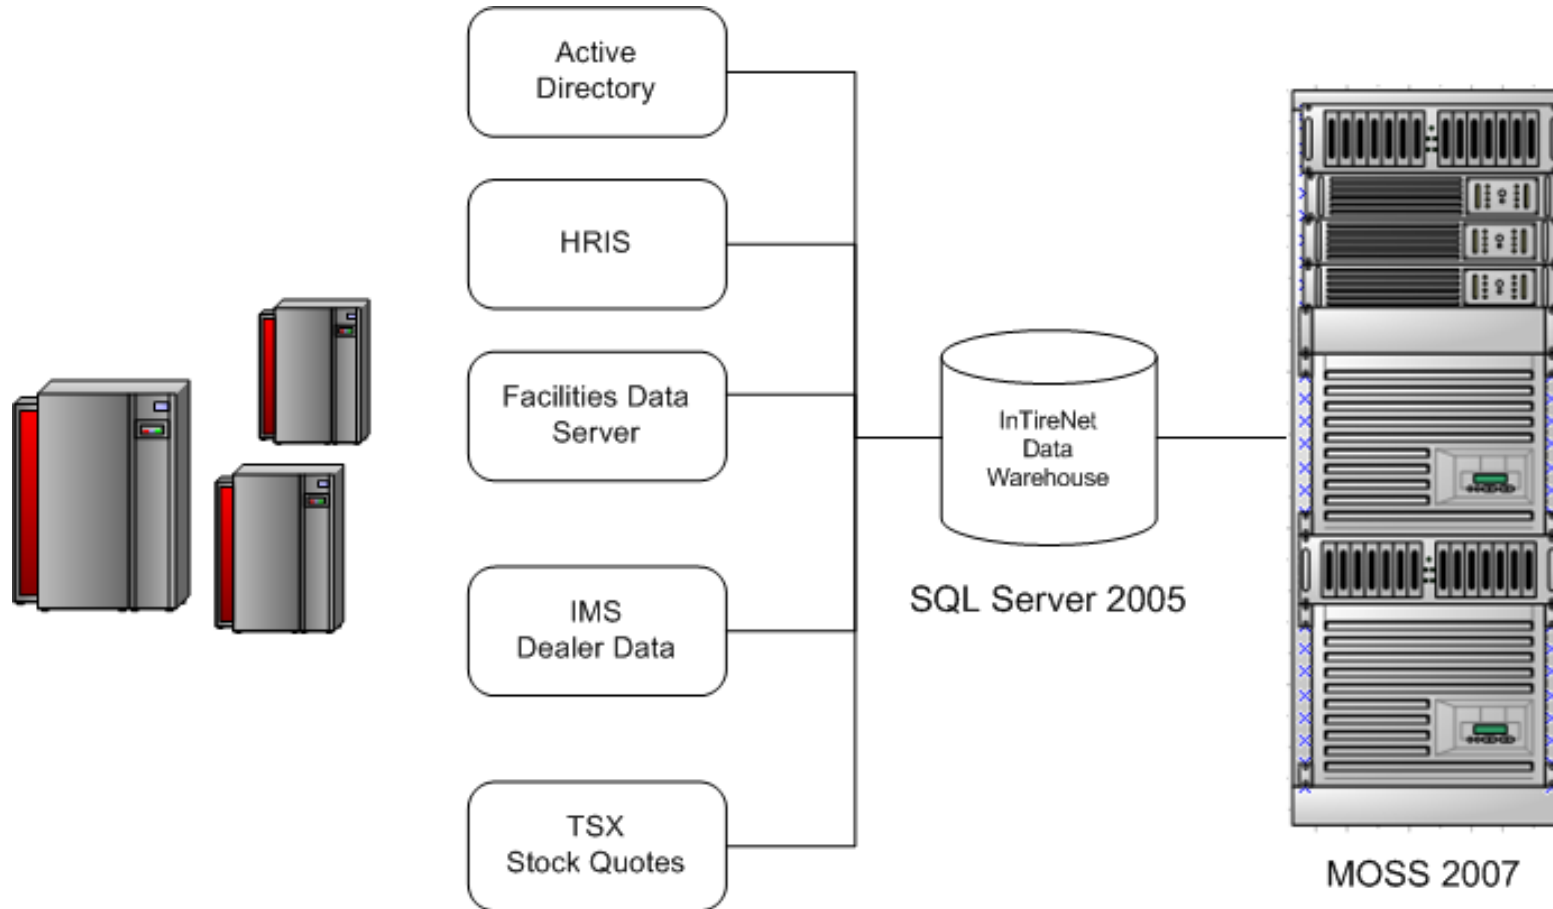

Promotes corporate-wide news such as financial results, Staff A events and Foundation for Families news

Click here to vote and view poll results

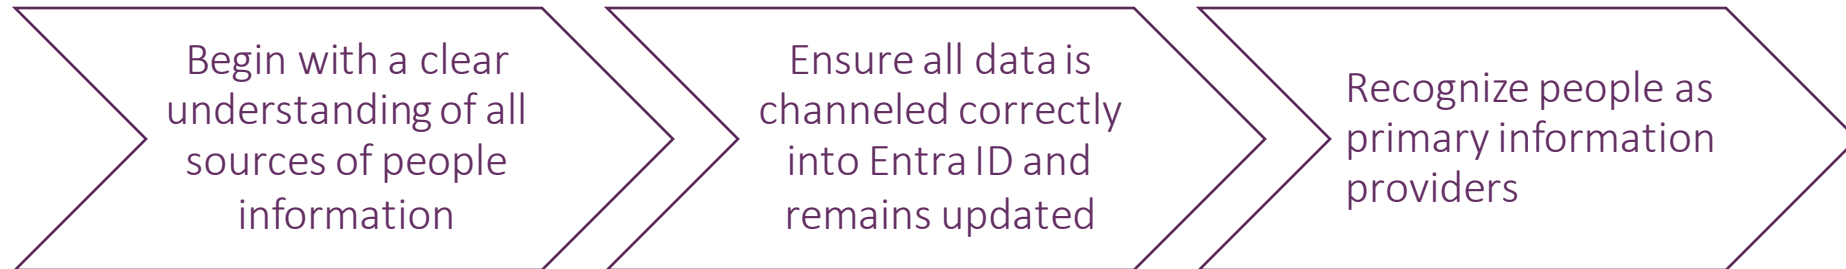

Check Canadian Tire's stock price

The screenshot shows the InTIREnet website interface. At the top, there is a navigation bar with links for HOME, COMMUNITY, CORPORATE, PEOPLE, and LINKS. A search bar is located on the right side of the navigation bar. Below the navigation bar, there are several content sections: CTC HEADLINES, INDUSTRY HEADLINES, ONLINE POLLS, and STOCK PRICE. A dropdown menu is open under the PEOPLE link, showing options like Job Postings, Online Forms, and EnTireHealth. A search dropdown menu is also visible, showing options like This Site: InTIREnet, All InTIREnet, Dealer Search, and People Search. The website features a red and white color scheme with a Canadian Tire logo at the top center.

People Data Warehouse

Streamlining and Integrating Your Systems

So, you've level-set your systems in Entra ID – Now What?

- One Source of Truth: with Entra ID, all people data comes from a unified, trustworthy location
- Conflict-free Data: eliminated discrepancies across all repositories for seamless syncing and integration
- Next step: Leverage efficient indexing and profile retrieval in a high-quality and accurate People Search and Directory built on top of Microsoft 365

Is Great People Search Possible?

- Finding people with the right knowledge drives adoption and utilization on intranets
- Always updated and accurate people info improves resource utilization and collaboration in the organization and within communities
- But the Admin feels like Sisyphus. Employees and community members:
 - Join
 - Leave
 - Change roles
 - Learn something new every day
 - Can't/won't tell you what they know

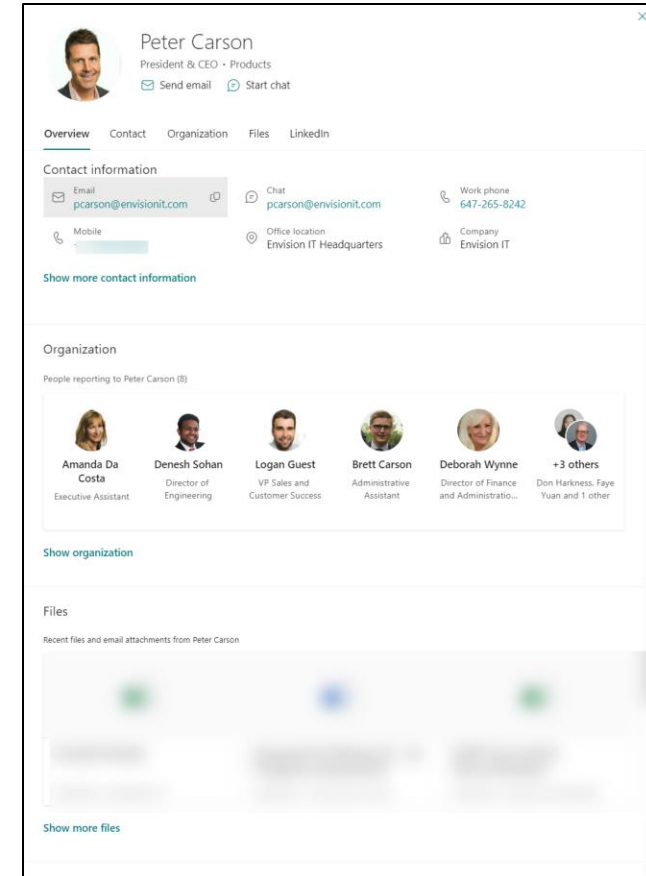

Surfacing People's Untapped Potential with OOTB Microsoft 365

People Search is important because the knowledge in people's heads is so much of the intellectual property that you have as an organization.

- By not tapping into their knowledge, you can lose a huge amount of potential value of your organization.
- Out-of-the-box Microsoft 365 solutions for surfacing employee knowledge:
 - Microsoft Search
 - People Cards
 - People Webparts
 - Org Chart webparts
 - Microsoft Delve

Leveraging People Cards to Highlight People's Expertise

- Microsoft has standardized People Cards across all applications
- Can customize information on People Cards via Microsoft Graph
- Organizational chart
- Surface in Teams, Outlook, SharePoint, ...

People and Organization Chart Web Parts

-  **Peter Carson**
President & CEO
-  **Julian Mills**
VP Product and Marketing
-  **Logan Guest**
VP Sales and Customer Success
-  **Denesh Sohan**
Director of Engineering

 **Peter Carson**
President & CEO

People reporting to you (8)

-  **Amanda Da Costa**
Executive Assistant
-  **Deborah Wynne**
Director of Finance and Administration
-  **Denesh Sohan**
Director of Engineering
-  **Don Harkness**
Chief Financial Officer
-  **Faye Yuan**
Senior Accountant
-  **Julian Mills**
VP Product and Marketing
-  **Logan Guest**
VP Sales and Customer Success
-  **Peter Carson**
President & CEO

Delve

The screenshot displays the Microsoft Delve interface. At the top, the navigation bar includes the Envision IT ExtranetUserManager logo, the word "Delve", and utility icons for settings, help, and a user profile. A search bar is located on the left side of the navigation bar.

The left-hand navigation pane contains the following elements:

- Home
- Me
- Favorites
- People section with a list of contacts: Julian Mills, Amanda Da Costa, Jessy Taonga, Logan Guest, Mark Campbell, Maha Elkoshairi, and Anish Birju.

The main content area features a profile card for Peter Carson, President & CEO of Envision IT Headquarters. The profile includes contact information for email (pcarson@envisionit.com), phone (647-265-8242), and mobile (416-561-4885), as well as a link to his OneDrive. Below the profile is a "Today" activity bar and an "About me" section with options to add projects, skills, and education.

The central section is titled "Get back to your recent documents and email attachments" and includes a "See all" link. It displays two document cards:

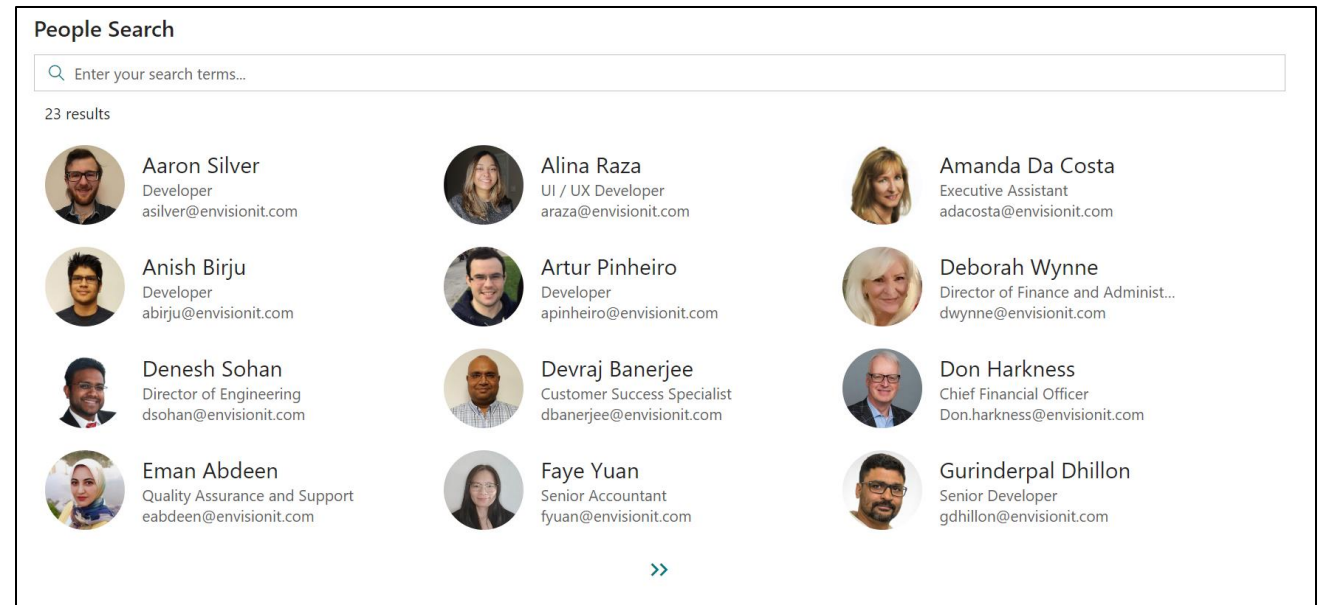

- A PowerPoint slide titled "Building a Rich People Search with OOTB and Open-Source Components" with 104 views, categorized under Marketing.
- An Excel spreadsheet titled "Sample People" with 27 views, categorized under Development.

The bottom section is titled "Click a person to see what they're working on" and includes a "See all" link. It shows a row of six profile cards for Amanda Da Costa (Executive Assistant), Logan Guest (VP Sales and Custo...), Julian Mills (VP Product and Ma...), Careers, Don Harkness (Chief Financial Offi...), and Irina Kenic (Marketing Specialist).

At the bottom of the interface, there are sections for "Organization" and "Discover documents from people around you", both with "See all" links.

Microsoft Graph People Search Web Part

- Open source
- Based on Microsoft Graph and deployed within SharePoint Online
- Addresses the following requirements:
 - Show person cards
 - Free text search
 - Configurable search query
 - Customizable
 - Render the out-of-the-box Live Person card (LPC) on hover

Thank you for inputting your profile information. By doing so, you're providing a richer conference experience for yourself and follow attendees. We are committed to protecting your privacy, as detailed in ShareThePoint's [Privacy Policy](#). Client records, as detailed in our [Terms & Conditions](#), are regarded as confidential and will not be shared with any third party, other than our suppliers and, if legally required to do so, to the appropriate authorities.

Key Takeaways

People are the most important source of intellectual property in your organization

Making it easy to discover and amplify employee's expertise can lead to significant value gains within your organization

A user-friendly People Search and detailed Directory fosters a connected work environment for effective collaboration and efficient knowledge transfer

People Search can be achieved with OOTB Microsoft, Open-Source Webparts, and third-party commercial products.

The quality of your People Search is directly proportionate to the quality of your data source(s).
