

See What's Really Happening in Your Microsoft 365 Tenant

Get Ready for Copilot

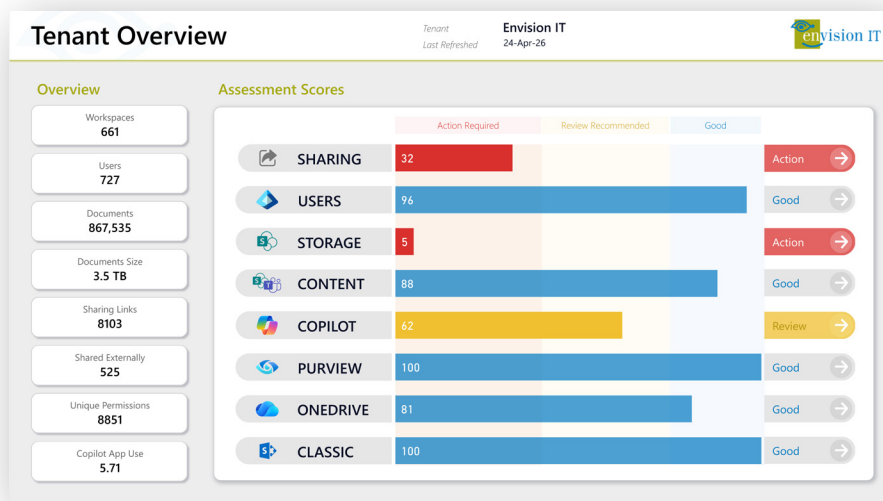

Find risks before Copilot surfaces them

Control Oversharing

Reduce risk by tightening access and permissions at scale

Reclaim Storage

See what's eating your storage and uncover opportunities to reduce spend

Improve Compliance

Apply and enforce sensitivity labels across your Microsoft 365 tenant

Identify Inactive Users

Spot unused or inactive accounts that introduce risk and increase licensing costs

Modernize SharePoint

Plan your move from Classic to Modern with confidence

Make Microsoft 365 Easier to See, Manage, and Control

> Identify Risks and Stop Oversharing

Quickly surface sharing links and broken permissions across your tenant. Take action to reduce risky access and regain control over sensitive content.

> Storage and License Optimization

See how storage is being used and identify stale or low-value content, and understand where licenses may be under-utilized so you can reduce spend.

> User Adoption and Copilot Readiness

Understand how Microsoft 365 and Copilot are being used across your organization to identify inactive users, adoption gaps, and readiness opportunities.

> Modernize and Prepare for What's Next

Identify legacy sites, stale content, excess storage, and readiness gaps so you can move or modernize with confidence and control.

From Instant Insight to Confident Action

Most organizations know something isn't quite right in their Microsoft 365 environment, but without clear insight, it's hard to know where to start. Tenant Dashboard for Microsoft 365 provides instant visibility into tenant health, helping you understand what needs attention and what to prioritize next.

> Uncover Issues Fast

Get a clear view of risks, gaps, and inefficiencies across your Microsoft 365 tenant and where to take action..

> Control Oversharing

Reduce exposure by tightening access and permissions before sensitive information is unintentionally shared.

> Drive Copilot Adoption

See sharing, sensitivity, and risk insights across your entire Microsoft 365 tenant in one place.

> Govern with Confidence

Make tenant governance, modernization decisions and ongoing maintenance easier with clear, actionable insights.

A Powerful Dashboard Built for Instant Action

Take Action on Insights

Every insight is actionable. Record decisions and apply changes directly without switching tools.

Import/Export Data

Choose specific datasets and export them to Excel for easy reporting and analysis. Use PowerShell automation to apply changes confidently at scale.

Deep Dive into Tenant Health

Know exactly where the problems are in your tenant and take immediate action to resolve them.

Copilot Usage Insights

See how Copilot is being used across Microsoft 365 to identify adoption trends, potential risks, and areas that need attention.

Purview Label Management

See where Purview labels are applied and bulk-assign labels to sites and libraries to reduce compliance risks.

Power BI Reporting
