Search anywhere, public or private.

**Connect Teams**  
Instant collaboration and better results.

## Unleash Your Team's Potential, Manage People Smarter

### > Make Employee Potential Visible

Make it easy to see and search what every person is capable of.

### > Breakdown Knowledge Silos

Connect disparate systems into a single searchable people portal.

### > Centralize Policy Management

Create, publish, and monitor policies with digital sign-offs and automatic compliance reporting.

### > Kudos and Recognition

Encourage a culture of appreciation and celebrate each other's contributions.

# When Managing Gets in the Way of Leading

## > Compliance Gaps

Missed policy updates and sign-offs make it harder to keep teams informed and accountable.

## > Hidden Talent

Managers and staff overlook skills and achievements, hindering recognition of strengths and opportunities.

## > Remote Challenges

Remote teams struggle to access shared knowledge, making it harder to stay connected and engaged.

## > Search Limitations

Basic search makes it difficult to find the right people or track compliance and contributions.

## Real World Scenario: Expediting Onboarding and Team Integration

A rapidly expanding organization is welcoming a wave of new hires across various departments. With so many new faces, it's challenging for employees to quickly connect with the right colleagues, comprehend company policies, and feel engaged from day one.

### Challenge

Traditional HR systems are slow to reveal expertise and policy requirements. New employees often have difficulty finding mentors, accessing essential documents, and receiving early recognition.

### Solution

Staff 365 gives new hires instant access to colleagues, policies, and recognition tools all in one place. Managers can easily track onboarding, ensure compliance, and help employees connect and succeed from day one.

## Powerful Features for Modern People Management

### Unified Data Integration

Consolidate employee profiles, policy documents, and recognition data from Microsoft 365 and other enterprise sources into a single, searchable platform.

### Flexible Search Integration

Choose public or private search modes to control visibility. Role permissions keep sensitive data secure while enabling broad access.

### AI-Enhanced People Search

Use Microsoft Search tools or custom based search pages to provide accurate, relevant, up-to-date people search results.

### Embed into Microsoft 365

Staff 365 leverages your existing infrastructure and investments, integrating seamlessly with your M365 parts for a more unified experience.

# Inspire your Teams, Transform your Workplace with Staff 365.
